# ADAM JUHÁS

C# developer

Currently studying Ing. in Design and Development of Software Systems at MUNI FI. Want to learn more about web development and working toward a full-stack role, combining React on the frontend with C#/.NET on the backend.

## EDUCATION

**Faculty of Informatics Masaryk University**  
**Master's degree (Ing.) in Software Engineering**  
Brno, Czech Republic

Currently studying

**Faculty of Informatics Masaryk University**  
**Bachelor's degree (Bc.) in Programming And Development**  
Brno, Czech Republic

2022 - 2025

## WORK EXPERIENCE

**Junior C# Developer**  
AMSYS, s.r.o

09/2024 - Present

Developing and maintaining WinForms applications for call center information system and attendance terminal.

**IT Support Technician**  
AMSYS, s.r.o

01/2024 - 08/2024

Scripting + Automation (Python, Kotlin)  
Creating and running SQL Queries in PostgreSQL Docker - Container Management

## PROJECTS

**LED-Matrix-Control-System - Bachelor thesis**  
React · Vite · Node.js · TypeScript · Arduino C++ · WebSocket  
Interactive LED matrix controller via WebSocket. React UI sends live commands to an Arduino system.

**Statistics Dashboard**  
ASP.NET Core · MVC · EF Core · Chart.js · JavaScript  
An interactive dashboard built with ASP.NET Core MVC for visualizing item and client statistics. Features dynamic charts and real-time data updates using an API.

**Film Festival Web Application**  
React · Tailwind · TypeScript · Redis · PostgreSQL · NX · Docker  
Full-stack app for film festivals with booking and admin control. Features modern frontend and backend.

**Pokémon Album Desktop Application**  
C# · WPF · MVVM · JSON · REST API  
MVVM-based WPF app for managing Pokémon cards with filtering, sorting, and persistent storage in JSON. Uses external API for real-time updates.

## TECHNICAL SKILLS

**Languages:** C#, TypeScript, Python, C/C++, Java  
**Frameworks:** React, Tailwind  
**Database:** PostgreSQL, Microsoft SQL Server  
**Tools:** Git, Docker, Vite

## INTERESTS
