React	Advanced	●●●○○	Typescript	Advanced	●●●○○
Kotlin	Intermediate	●●○○○	Python	Advanced	●●●○○

INTERESTS

🚴 F1, Cycling

📖 Anime, TCG

PROJECTS

FilmFestival

Web application designed to manage and showcase a film festival, allowing users to view films, book seats, and explore festival information. The application is built with React and Tailwind CSS for the frontend, and TypeScript for backend using Reddis as database and Axios for API.

https://github.com/Marneyd8/FilmFestival

EasyFood

Asynchronous desktop application in the Java language using the Swing library for the user interface, H2 as a database and Maven for building the project.

https://github.com/Marneyd8/EasyFood
